4mm SCALE SECTION

Slaters do not produce any 4mm scale wheels. Our kits do include wheels produced by another manufacturer, but we cannot supply them separately. For details of Slater's 4mm scale wagon kits, contact C&L Finescale, Longridge House, Cadbury Camp Lane, Clapton-in-Gordano, Bristol, BS20 7SD

4MM SCALE COACH KITS

These kits consist of injection moulded roof, sides, ends and solebars with sprung turned brass buffers, etched Cleminson underframes for the 6 wheel kits, lost wax cast door handles and gas lamp tops. The kits are supplied complete with wheels for 00/EM only. A special etched underframe for EM/S4 modellers is available (please state gauge requirement when ordering)

7mm Scale Locomotive Wheels						
All locomotive wheelsets comprise 2 wheels and an axle. Driving Wheels come complete with crankpins. Most driving and bogie/tender wheels have a 3/16" square-ended axle with fixing screws. Some wheelsets (as marked, and mostly smaller sizes) have a 1/8" axle. Wheelsets marked O/C have an extended axle to take our outside cranks.

Scale 7 Locomotive Wheels

The wheels listed are made for the Martin Finney 'Rover' kit, but may suit other BG locos. The driving wheels are mounted on a 3/16in axle (requiring our standard Allen key); the tender and carrying wheels are on a 5/32in axle.

Slater's also manufacture a small range of (standard gauge) Locomotive Driving Wheels to S7 profile. These are sold exclusively by the S7 Society, to whom enquiries should be addressed.

LARGER SCALE WHEELS

Gauge 1 (10mm scale) Locomotive Wheels

All wheels are to Standard Profile (prefix 'S') unless marked '**Fine**' and prefixed 'F'. Locomotive Driving Wheelsets comprise 2 wheels and a 1/4" diameter square-ended axle with fixing screws and come complete with 'short' crankpins (for coupling rods only). The conversion pack (Ref. 9805 - see G1 Accessories) is needed to create the 'long' version for coupling and connecting rods. Bogie/Tender wheels have a 3/16" diameter square-ended axle with fixing screws.
